A Major U.S. Bank awards a Significant New Contract Order to RIWI

Toronto, ON – RIWI Corp. (TSXV: RIWI) (OTC: RWCRF) (the “Company” or “RIWI”), a global trend-tracking and prediction technology firm, announces that a major U.S. bank (the “Bank”) has awarded an initial contract order to RIWI for a significant amount under its new three-year long-term agreement (the “Agreement”).

RIWI’s offerings for the finance sector include: predictions about major geopolitical events that significantly impact equities and markets; high-frequency data on the behavioral and labor market impacts of public health phenomena, such as COVID-19 vaccine approvals and vaccine hesitancy; and real-time analytics about fast-changing consumer sentiment, employment, and business investment trends across China.

RIWI and the Future of Data Collection – Public Webinar, November 19, 3:30 pm Eastern Standard Time:

Please join us for: “The Legacy Polling Industry’s ‘Instrument Error’ and the US 2020 Presidential Election – Why RIWI and other Anonymous Prediction Tools are Making the ‘Art’ of Polling Obsolete”.

RIWI is among the only data organizations in the world to have defied media and consensus polling wisdom in the 2020 US election (RIWI always [predicted](#) an extremely close Electoral College race) and the 2016 US election (RIWI predicted an Electoral College win for President Donald J. Trump and the popular vote for Secretary Hillary Clinton). RIWI also predicted the outcomes of the key 2018 US Senate races, the turnout model that would define the outcome of Brexit and many market-moving, [significant events](#) across the globe, starting with the fall of the Mubarak regime in February 2011. In this talk, Jennifer Curley, President and CEO of Curley Company and publisher of The Association 100, the newsletter that provides actionable strategies and trends to top association executives across the United States, interviews Neil Seeman, founder and CEO of RIWI, to discuss why instrument error is the core problem with traditional polling – and why it is getting worse. Prior to founding Curley Company, Ms. Curley served as a Vice President at Edelman Public Relations Worldwide, where she ran the technology policy practice. During the Administration of President Bill Clinton, she was a political appointee in the Protocol Office of the White House and Department of State. Ms. Curley started her career in the United States Senate as an aide to Senator Daniel Patrick Moynihan.
